Fiscal Year 2013

(July 1, 2012 - June 30, 2013)

Chuck Gipp, Director Iowa Department of Natural Resources Wallace State Office Building 502 E 9th Street Des Moines, IA 50319

Performance Report

[PERFORMANCE RESULTS ACHIEVED]

This report reflects the progress made during fiscal year 2013 toward our goals and provides information regarding the condition of our state's natural resources and the effectiveness of our programs.

Introduction

The work of the Department of Natural Resources impacts the lives of all lowans. Iowans deserve a clean environment and quality natural areas for public use and enjoyment. This report reflects the progress made during fiscal year 2013 (FY13) toward our goals and provides information regarding the condition of our state's natural resources and the effectiveness of our programs.

In FY13, we continued to improve collaboration with other executive branch agencies. The DNR and DOT work very closely on the issuance of permits needed for road and bridge constructions, but recently we have also been working together to meet the administrative needs of the agencies. The DNR is working closely with the DOT to adopt an Electronic Records Management System used by the DOT. This system will improve accessibility to public documents and reduce the amount of paper files retained in storage. The DNR also continues to improve collaboration with other agencies, such as the Iowa Economic Development Authority as we work closely with them on business development in the state.

The DNR strives to continually improve our **customer service** and how we can meet lowan's needs. As an example, the online reservation system for campground reservations has grown over the past eight years so that now 88% of the camping reservations are made online. The DNR continues to improve our online presence and accessibility.

In FY13 the Iowa Legislature approved paying off the State's bond debt used to construct **Honey Creek Resort State**Park. By removing this debt, the DNR will be able to focus more on the future of the Resort, rather than the past debt.

Finally, in August of 2012, the DNR was faced with a tragic accident, where a seasonal parks employee died after rolling a mower into a lake. This incident has caused us to establish a **Safety Program** at the DNR and to review all of our departmental safety trainings, programs, and equipment. By focusing on our employee's safety and well being, it is another way that we can demonstrate that at the DNR, our employees are our greatest asset.

We invite citizens, businesses, government agencies and non-profit organizations to join with us in a dialogue about how we can continue to protect our resources and get lowan's outdoors so all may benefit from lowa's remarkable natural resources.

Chuck Gipp, Director lowa Department of Natural Resources

Agency Overview

Vision: The vision for the Department of Natural Resources is leading lowans in caring for our natural resources.

Mission: The mission of the Department of Natural Resources is to conserve and enhance our natural resources, in cooperation with individuals and organizations, to improve the quality of life for lowans and ensure a legacy for future generations. The mission is outlined in the Code of lowa 455A.2: "A department of natural resources is created which has the primary responsibility for state parks and forests, protecting the environment, and managing energy, fish, wildlife, and land and water resources in this state."

Four strategic goals focus DNR's attention:

- Iowa will have a healthy and attractive environment for work and play.
- 2. Iowa will have abundant, highquality resources for responsible use and enjoyment.
- Our constituents (the public) will participate in outdoor recreation and engage in sustaining lowa's natural resources.
- The Department of Natural Resources continually strives to improve organizational performance.

Major services and products of DNR:

The Department has a wide range of functional responsibilities. To meet them, the DNR core functions include:

A. Resource protection and management including:

- Fish and wildlife populations and their habitats on public and private lands
- 2. Forest resources on public and private lands
- 3. Air, groundwater, surface water, and land resources while simultaneously considering economic development needs.
- B. Recreation including:
 - Healthful, outdoor recreational opportunities for 900,000 hunters, anglers, and boaters, 1 million wildlife enthusiasts and over 14 million park visitors.
 - Own and manage 479,900 acres of public land and facilities including 85 parks, 489 wildlife areas, 275 lakes, and 10 state forests.
 - 3. Technical assistance to landowners, local governments, business and industry and other state agencies for environmental and natural resource management.
- C. Regulation and enforcement including:
 - License, permit and regulate hunters, anglers, and boaters, confined animal waste facilities, underground storage tanks, leaking underground tanks, public water supplies, solid waste facilities, and contaminated sites.
 - Certification of drinking water operators, waste water treatment operators, animal waste applicators, and well drillers.
 - 3. Compliance inspections at various regulated facilities.
- D. Information and general assistance including:
 - The general website has more than 1.2 million page views per

- month with approximately 150,000 unique visitors.
- The central DNR call center answers over 70,000 calls and approximately 10,000 email inquiries.
- Circulation of 50,000 copies per issue of the Iowa Outdoors magazine.
- 4. Provide weekly news packets on environmental and natural resource issues.
- E. Research, natural resource inventory, and data collection
- F. Financial assistance, including loans and grants to individuals, businesses, industries, schools and other government entities.
- G. Internal customer services to administer all DNR programs.

The DNR has 948 permanent employees. Seasonal employees, interns and contract employees comprise the remaining positions totaling 1,145.95 full-time equivalent (FTEs) positions. Males (70%) outnumber females, and

Caucasians (95%) outnumber minorities. The average employee is 44 years old with 15 years of tenure with the state. In total there are 78 job classifications used within DNR. Professional positions comprise the largest group, especially those requiring education and training in scientific, engineering and conservation fields. Three labor unions represent DNR staff: American Federation of State, County and Municipal Employees, lowa United Professionals, and the State Police Officers Council. Non-contract employees represent 22 percent of the staff.

In FY2013, the DNR had an operational budget of \$125.5 million and an overall budget of \$211.1 million derived from various revenue sources. Of that budget, 10 percent is appropriated from state general funds with the remainder from federal sources, fees or other sources.

Key Results

Services, Products, Activities: Watershed Protection and Restoration

Results

Description: The protection and restoration of lowa's waters are among DNR's most important responsibilities. lowa's waters reflect the integration of rural and urban land management within the watersheds.

Why we are doing this: Water is vital to lowa today and in the future. Quality water is necessary for business and industry, human consumption, wildlife, recreation, and for

creating the quality of life lowa communities need to thrive and grow.

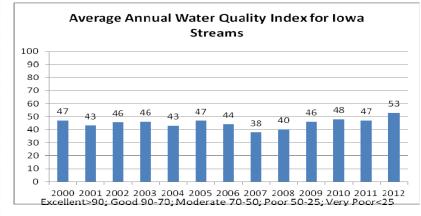

What we're doing to achieve results: DNR issues permits for wastewater discharges and enforces permits to protect water quality. In addition, waters are being assessed and prioritized for protection and improvement programs. DNR is now promoting watershed planning with local groups as we seek to maximize the benefits of water for health, wildlife, business and recreation.

Performance Measure:

Water quality index for Iowa streams
(Iowa Water Quality Index)

Performance Target:

Target: 40

What was achieved: Water monitoring provides DNR with a scientific basis for evaluating and understanding our stream water quality. The Iowa Water Quality Index (WQI) is calculated monthly at DNR ambient stream monitoring sites. Water quality in streams is classified as excellent, good, fair, poor, or very poor based on WQI values. The average WQI in 2012 is 53. From 2011 to 2012, the percentage of stream WQI values classified with poor or very poor water quality decrease from 45% to 41%. Additionally, the percentage of stream WQI values classified with excellent or good

water quality increased from 10% to 28% during the same period.

Resources: Watershed protection efforts are supported by the TMDL and CWA Section 319 programs (\$4.4 million in federal funds and 12.5 FTEs), the Lake Restoration program (\$8 million and 2 FTEs), and the Water Monitoring program (\$374,856 from EPA through the Performance Partnership Grant and other grants, and \$2.96 million from Environment First Fund 13 FTEs).

Data Sources: DNR, Water Monitoring and Watershed Improvement Sections

Key Results

Services, Products, Activities: Renewable Energy and Resource Efficiency

Description: Promotes energy and water conservation, the recycling and re-utilization of solid waste, reduction or elimination of hazardous waste, conversions of waste to energy, promotes alternative fuels and energy sources, and the generation of less waste in processing.

Why we are doing this: Increasing the efficient use of natural resources and protecting our environment are national and state goals. Business can advance these goals and improve corporate profits which promote a stronger lowa economy and improve our quality of life.

What we're doing to achieve results:

DNR demonstrating The that technologies make conservation aood economic sense to both businesses and private citizens. The DNR forms partnerships with lowa businesses and recruits students to serve as interns at participating companies. Staff identify processes that can benefit from increased efficiencies and interns conduct research. analysis and help the companies implement After gaining experience with an lowa company, approximately 25% of these highly skilled students are offered positions to stay and work in lowa and remain committed to furthering pollution prevention goals.

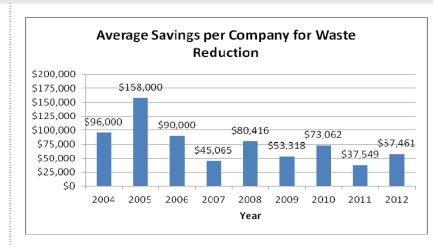

Results

Performance Measure:

Average dollars saved per company annually through verifiable implemented waste reduction practices recommended by Pollution Prevention interns

Performance Target:

Target: \$100,000

What was achieved: Nineteen lowa companies saved \$1,091,759 through the interns who served them in 2012. The greatest economic benefits came from energy savings, water conservation, solid waste reduction, and hazardous and special waste reductions.

Resources: Renewable energy and resource efficiency programs are supported by the groundwater protection fund and US EPA and USDA grants. The total program cost is \$900,000 and 5.85 FTEs are involved

Data Sources: 2012 Pollution Prevention Intern Program, Case Summaries, DNR

Core Function: Enforcement and Investigation

Description: The Law Enforcement Bureau ensures compliance with regulations by hunters, anglers, boaters, fur-harvesters, snowmobile and ATV operators, and park visitors; investigates violations of laws; and promotes safe outdoor recreation practices.

Why we are doing this: Law enforcement is done to protect the natural resources of lowa and to promote safe, lawful enjoyment of these resources by

lowa citizens.

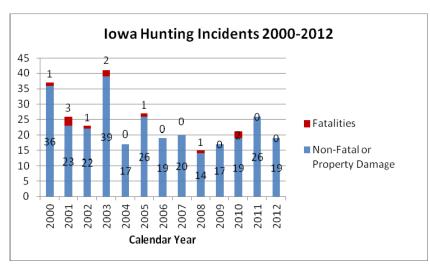

What we're doing to achieve results: Education is the key to enjoying outdoor activities safely and to develop compliance with applicable laws. Safety classes are provided for hunting, boating, snowmobiling, and all terrain vehicle In addition, a friendly but operation. professional presence in the field by conservation officers is essential to assure safety compliance. and

Performance Measure:

Number of hunter incidents

Performance Target:

25

What was achieved: Proactive hunting education programs focused on the safe and lawful use and enjoyment of lowa's natural resources continues to be a main factor in lowa's low number of hunting incidents...

Resources: Resources for fish and wildlife enforcement includes 125.3 FTEs and \$12.5 million coming from the Fish and Wildlife Trust Fund.

Data Sources: DNR, Law Enforcement Bureau

Results

Core Function: Recreation

Description: State parks, forests, wildlife management areas, preserves, rivers and lakes are managed to protect natural resources and encourage the public to enjoy lowa's natural resources.

Why we are doing this: Natural resources are important economic factors and vital for the quality of life of lowans. Both public and private lands are important as vital habitat and as important for lowan's use. Private lands provide most of the watershed area that provides runoff for our

streams and the habitat for our fish and other aquatic life.

What we're doing to achieve results: DNR is trying to provide more public land, and work with private landowners to encourage more conservation on their lands. In the case of deer, hunting is the primary management tool available to control herd size. DNR is making more deer hunting permits available and encouraging the harvest of does.

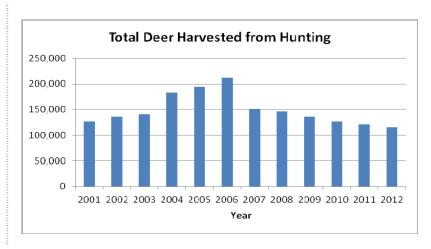

Results

Performance Measure:

Annual deer harvest that will promote a healthy population

Performance Target:

140,000

What was achieved: Hunters reported harvesting 115,608 deer in lowa during the 2012-13 seasons, which is 4.8 percent lower than the 121,407 deer reported in 2011-12. To date, lowa's deer population has been reduced by 32 percent from its peak in 2006, and is still declining in some areas. In areas where deer numbers have not reached the department's goal, hunters will still have the option to kill extra does. Many of these areas are near cities and towns where hunting is restricted due to safety or in southern lowa where hunting

pressure is lower. There were 378,454 deer licenses issued during 2012-13, down slightly from the previous year's total of 392,930. Does made up 48% of the reported harvest.

Resources: The fish and wildlife programs are supported by the Fish and Wildlife Trust Fund. In total there are 265 FTEs supported with \$24.6 million.

Data Sources: DNR, Wildlife Bureau

Services, Products, Activities: Public Lands and Outdoor Recreation

Description: The management of the infrastructure and natural resources at state parks, recreation areas, campgrounds, and state preserves that protects the animal, plant and water resources, and allows lowans to enjoy these beautiful public areas in many ways.

Why we are doing this: Outdoor recreation is important to health and quality of life for lowa citizens. Our state parks are also important revenue generators to communities around them. Further, recreation can be an important factor for businesses deciding where to locate or for people to decide where they want to live. DNR parks are among the public lands most accessible to lowans.

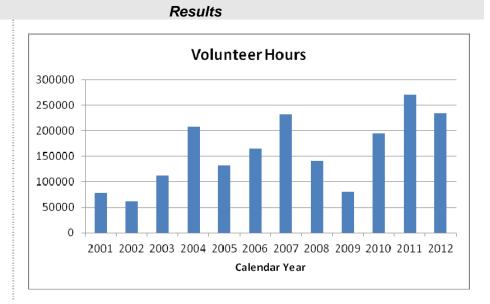

What we're doing to achieve results:

DNR is attempting to upgrade facilities and opportunities in the parks. Volunteers are a part of this as they assist in the construction and maintenance of recreational trails and facilities within state parks as well as serve campground hosts and provide educational programs for park visitors. The DNR continues to compete with other organizations for volunteers. The addition of a volunteer grant program this year allowed for volunteer groups to compete for funds to purchase materials for projects while donating the labor.

Performance Measure:

Number of Hours donated by DNR volunteers

Performance Target: 150,000 hours

What was achieved: The DNR had 34,391 volunteers donating over 234,615 hours of their time to our state's natural resources. Their time represents the equivalent of nearly 112 full-time staff and is valued at nearly \$4 million.

Resources: The volunteer program has 1.5 FTEs funded through \$100,000 from the general fund and the Environment First Fund.

Data Sources: DNR, Office of Volunteer Services

Core Function: Regulation and Compliance

Description: Activities that release significant quantities of pollutants into the environment are regulated to meet air, water and soil standards through permitting activities and through regular compliance inspections.

Why we are doing this: Permits and compliance monitoring is conducted to keep air, water, and soil safe for humans and the environment. Standards used for permits and compliance activities are based on health standards for humans or other organisms.

What we're doing to achieve results:

The Kaizen process has been utilized extensively to improve various permitting processes. This brings together all stakeholders to discover systematic weaknesses and identify new strategies to make the process more efficient. Further, staff works towards coaching compliance, but when that fails, the Department issues official notices of violations or Administrative Consent Orders requiring compliance.

Performance Measure:

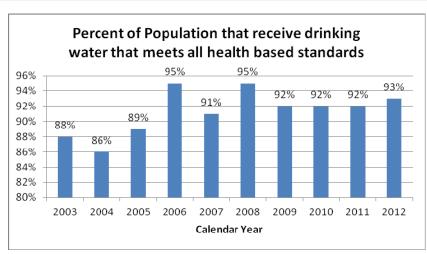

Percentage of the population served by public water supplies that receive drinking water that meets all health-based safe drinking water standards

Performance Target:

Target: 85%

What was achieved: Public water supplies continue to provide high quality water to their users. Of 2.89 million people served by public water supplies, 2.71 million receive water meeting all health-based drinking water standards. Of the 1,918 regulated public water supplies, 93.4% of the systems had no violations of a health-based drinking water standard.

Results

Resources: Regulation and Compliance core functions represent 89 FTEs and are funded with \$10.4 million. The drinking water program has 33 FTEs and utilizes \$3.8 million coming from federal sources and the Water Protection Fund.

Data Sources: State of Iowa Public Drinking Water 2012 Annual Compliance Report

C	Core Function: Conservation, Preservation and Stewardship				
F	Performance Measure (Outcome)	Performance Target	Performance Actual	Performance Comments & Analysis	
1.	Number of Impaired Waters in lowa	282	480	What Occurred: The 2012 List of Impaired Waters was finalized by the US Environmental Protection Agency on 4/24/2013. Data Source: DNR, Watershed Monitoring and Assessment Section	
2.	Percentage of lowa's publicly owned lakes with water clarity (secchi depth) greater than 1 meter.	50%	53%	What Occurred: Water clarity is commonly utilized by the public to determine water quality. For calendar year 2013, 53% of the 129 lakes sampled had average water clarity greater than 1 meter. Data Source: DNR, Watershed Monitoring and Assessment Section	
3.	Percent of Iowa's Nongame Breeding Bird species with stable or increasing populations	66%	64%	What Occurred: From data collected for the National breeding bird Survey through 2011, 62.1% of Iowa's nongame birds are increasing, 35.9% are decreasing, and 2% are stable. Data Source: Nongame Wildlife Program, DNR	
4.	Number of pheasants per route of the annual August roadside surveys.	40	8	Data Source: 2012 Iowa August Roadside Survey, Wildlife Bureau, DNR. September 2012.	
5.	Number of communities identified by the U.S. Forest Service as developing or managed Urban Forestry communities.	325	327	Data Source: Forestry Bureau, DNR	
6.	Acres of Land in conservation easements or programs, state, county conservation board, or federal ownership, or NGOs.	3,500,000	2,305,841	What Happened: CRP acres of 1,529,457, WRP acres of 91,930, DNR owned 364,188 acres, DNR easements of 4,040 acres, County Conservation Boards of 193,624 acres, Federal Lands of 122,602 acres.	

S	Service, Product or Activity: Watershed Protection and Restoration				
	Performance Measure	Performance Target	Performance Actual	Performance Comments & Analysis	
1.	Water Quality Index for Iowa streams	40	53	What Occurred: The water quality index is a composite of ten pollutants to determine the quality of our streams on a scale from 0-100. The statewide average annual index for 2012 was slightly higher than in 2011. Data Source: DNR, Watershed Monitoring and Assessment Section	
2.	Number of streams with sustainable trout reproduction.	35	36	What Occurred: Recent efforts in the watersheds of coldwater streams combined with in-stream improvements have resulted in consistent, natural reproduction of trout in 36 streams covering approximately 80 stream miles. In addition, 30 streams exhibit recent but inconsistent reproductive success.	
3.	Acres of forest land plus the acres enrolled in the USDA programs of CRP and WRP.	4,850,000	4,607,387	Data Source: Fisheries Bureau, DNR What Occurred: Total forest acres continue to increase, although lowa's oak and hickory forest resources are shrinking. Conservation Reserve Program acres have decreased as high grain prices make renewal of CRP contracts less likely and the conservation benefits of these acres for water quality and wildlife may be reduced. Forest Land= 2,986,000, CRP=1,529,457, WRP=91,930. Data Source: Forest Resource Analysis; Farm Services Agency and Iowa	
4.	Percentage of available clean water SRF funds allocated.	93%	96%	Natural Resources Conservation Service web sites. What Occurred: The use of SRF funds continues to grow from 74% in FY2003 to the present level of 96% through the development of non-point source loans, improvements to processing procedures, and more effective marketing of services. Data Source: Department of Natural Resources, SRF Loan Program	

Service, Product or Activity: Renewable Energy and Resource Efficiency						
Performance Measure	Performance Target	Performance Actual	Performance Comments & Analysis			
Average Dollars Saved per Company from P2 Waste Reduction	\$100,000	\$57,461	What Occurred: Savings per participating company varies with the types of environmental savings appropriate for the companies. Interns who identify the savings continue to function at a very professional level. Nineteen lowa companies saved \$1,091,759 through the interns who served them in 2012. Data Source: Iowa Department of Natural Resources P2 Program Case			
			Nineteen Iowa companies saved \$1,091,759 through the interns who served them in 2012.			

Core Function: Enforcement and Investigation					
Performance Measure (Outcome)	Performance	Performance	Performance Comments & Analysis		
	Target	Actual			
Rate of compliance with hunting regulations among	92%	95%			
hunters checked.			Data Source: DNR, Law Enforcement Bureau		
2. Number of Hunter Incidents including Fatalities	20	19	What Occurred: Prevention of hunting accidents is a high priority for the Law Enforcement Bureau. Education and enforcement continue to make hunting safer for all participants. In CY2012, there were 13 personal injury and 6 property damage incidents. Data Source: DNR, Law Enforcement Bureau		
Number of Boating Incidents including Fatalities	50	31	What Occurred: In CY2012 boating incidents were down from 42 in CY2011.		
			Data Source: DNR, Iowa Boating Education Program		

Se	Service, Product or Activity: Safe Outdoor Recreation and Conservation Enforcement			
	Performance Measure	Performance	Performance	Performance Comments & Analysis
		Target	Actual	
1.	Average number of conservation officer contacts for compliance per week.	25	45	What Occurred: Direct contact between conservation officers and the recreation public is vital to assuring compliance with laws and keeping activities safer. Such contact numbers with hunters, fishers, boaters and others were consistent throughout all portions of the state.
				Data Source: DNR, Law Enforcement Bureau
2.	Number of hunter safety students certified.	13,075	9,537	What Occurred: The number of hunter safety students in CY2012 is thought to be normal variation from year to year.
				Data Source: DNR, Law Enforcement Bureau
3.	Number of boating safety students certified.	1,000	1,387	What Occurred: Mandatory boating safety training for youthful boaters has increased the number of students certified. This will result in safer boating for all in future years.
				Data Source: DNR, Iowa Boating Education Program

Core Function: Recreation				
Performance Measure (Outcome)	Performance Target	Performance Actual	Performance Comments & Analysis	
Annual deer harvest that will promote a healthy population.	140,000	115,606	What Occurred: Hunters reported harvesting 115,606 deer in lowa during the 2012-13 seasons. To date, lowa's deer population has been reduced by 30 percent from its peak in 2006, and is still declining. Data Source: DNR Wildlife Bureau	
2. Number of counties within 10% of deer harvest target.	70	81	What Occurred: The county based antierless quota directs harvest to those counties where deer surveys and harvest indicate that deer numbers are higher than desired. These goals are based upon stakeholder attitude surveys and would represent a point where deer numbers are at a level that is acceptable to a majority of lowa's citizens. Data Source: DNR Wildlife Bureau	
Average park usage per capita per year.	4.6	5.1	What Occurred: During FY2013, it is estimated that lowa's State Parks received over 14 million visitors. The recent work by the lowa Parks 2020 initiative will continue to improve the facilities at our state parks and continue to increase user days. Data Source: DNR Parks Bureau	
4. Percent of State Parks with adequate Utility Infrastructure.	30%	50%	What Occurred: An Environmental Audit documented sewer, water supply and electrical infrastructure for all parks. Bringing all parks up to code is a part of the Parks 2020 plan. Data Source: DNR Parks Bureau	

Se	Service, Product or Activity: Public Lands and Outdoor Recreation					
	Performance Measure	Performance	Performance	Performance Comments & Analysis		
		Target	Actual			
1.	Number of State Park camper nights.	665,000	767,841	What Occurred: The 2012 camper season continued to see an increase in camper nights. Park improvements and camping reservations, along with good weather, probably account for the increases. Data Source: DNR Parks Bureau		
2.	Number of hours worked by DNR Volunteers.	100,000	234,615	What Occurred: DNR volunteers are an integral part of the Department. These volunteers assist with natural resource activities around the state. In 2012, 34,391 lowa volunteers provided the Keepers of the Land Volunteer Program with over 234,615 hours of service. That's equivalent to nearly 112 full-time employees, a value of nearly \$4 million. The Keepers of the Land AmeriCorps program also provides considerable assistance through the contributions of approximately 140 statewide AmeriCorps members. Data Source: DNR Volunteer Program		
_	A avec of state metrical areas	250,000	204 400			
3.	Acres of state natural areas.	350,000	364,188	Data Source: DNR Realty Services

1.	Violations of the national ambient air quality standards (NAAQS).	0 (zero)	3	In 2012, there was one violation of the 1-hr SO2 NAAQS, one violation of the annual PM2.5 NAAQS, and a violation of the Lead NAAQS. Data Source: EPA AQS Database		
2.	Percent of population drinking water in compliance with all health-based standards in the Safe Drinking Water Act.	85%	93%	What Occurred: Public water supplies continue to provide high quality water to their users. Of 2.88 million people served by public water supplies, 2.71 million receive water meeting all health-based drinking water standards. Of the 1,918 regulated public water supplies, 93.4% of the systems had no violations of a health-based drinking water standard. Data Source: State of Iowa Public Drinking Water 2012 Annual Compliance Report, June 2013.		
3.	Compliance Rate for USTs to Meet Environmental Guidelines	89%	79%	What Occurred: Spill and overfill – 79% and release detection – 89%. Number of inspections conducted 573 from 4/1/12 – 3/30/13 Data Source: DNR, Land Quality Bureau		

Se	Service, Product or Activity: Health and the Environment				
	Performance Measure	Performance Target	Performance Actual	Performance Comments & Analysis	
1.	NPDES inspections documenting compliance with applicable rules.	90%	81%	What Occurred: The DNR continues to work with regulated entities to achieve compliance with all applicable environmental regulations. Inspections in FY2013 resulted in an 81% compliance rate of NPDES inspections. Data Source: DNR Field Services Bureau	
2.	Percent of Drinking Water State Revolving Fund moneys allocated.	90%	93%	What Occurred: System improvements, new options, and marketing are improving the use of SRF funds. Data Source: DNR State Revolving Fund Program	
3.	Number of contaminated sites with evaluations or cleanups completed.	50	32	What Occurred: This measure replacing the number of contaminated sites with reduced health and environmental risks. Data Source: DNR, Contaminated Sites Section	
4.	Population served by viable Phase II sourcewater protection plans.	300,000	316,000	What Occurred: This measure evaluates sourcewater plans that have been implemented. Data Source: DNR, Sourcewater Protection Program	
5.	Average Lead Time for issuing air quality prevention of Significant Deterioration permits.	180 days	146 days	What Occurred: The Air Quality Construction Permit Section issued 193 PSD permits in FY13. Data Source: DNR, Air Quality Bureau	
6.	Average Lead Time for issuing air quality construction permits.	30 days	59 days	What Occurred: The Air Quality Construction Permit Section issued 1195 standard construction permits in FY13. Data Source: DNR, Air Quality Bureau	
7.	Average Lead Time for issuing open feedlot and confinement construction permits.	60 days	50 days	What Occurred: While the average time to issue a permit typically varies depending on backlog, no draft permit has ever been issued beyond the statutory 60 day period to issue. Draft permits for confinements are typically issued in 50-55 days and 50 days for final permits for feedlots. Data Source: DNR, Field Services and Compliance Bureau	
8.	Average Lead Time for issuing wastewater construction permits.	180 days	9 days	What Occurred: For FY13, 371 construction permits were issued, with an average turnaround time of 9 days from the time a completed application was received to permit issued. Data Source: DNR, Wastewater Engineering Section	
9.	Average Lead Time for NPDES permit issuance.	180 days	1290 days	What Occurred: 188 permits for industrial and municipal NPDES were issued in FY13. Of these, 21 were new applications received in FY13, and 167 were renewals of existing NPDES permits. Data Source: DNR, Wastewater Permit Section	
10.	Average annual savings per company for waste reduction.	\$50,000	\$57,461	What Occurred: Savings per participating company varies with the types of environmental savings appropriate for the companies. Interns who identify the savings continue to function at a very professional level. Nineteen Iowa companies saved \$1,091,759 through the interns who served them in 2012. Data Source: Iowa Department of Natural Resources P2 Program Case Suitonaries, 2012
