

Aviation System Plan 2010-2030 Individual Airport Report

Mason City Municipal Airport

Prepared for:

IOWA DEPARTMENT OF TRANSPORTATION OFFICE OF AVIATION

The preparation of this document was financed in part through an Airport Improvement Program grant from the Federal Aviation Administration (Project Number 3-19-0000-15-2009) as provided under Section 505 of the Airport and Airway Improvement Act of 1982, as amended. The contents do not necessarily reflect official views or the policy of the DOT or the FAA. Acceptance of this report by the FAA does not in any way constitute a commitment on the part of the United States to participate in any development depicted therein not does it indicate the proposed development is environmentally acceptable in accordance with appropriate public laws.

Individual Airport Report Mason City Municipal Airport

The *Iowa Aviation System Plan* Individual Airport Report provides an overview of the aviation system in Iowa, as well as specific information related to the Mason City Municipal Airport. Iowa's air transportation system plays a critical role in the economic development of the state and quality of life for Iowans. The *Iowa Aviation System Plan* evaluates existing conditions and makes recommendations for future

development of the air transportation system to meet the needs of users over the next 20 years.

Airport sponsors and airport management can use the Individual Airport Report to better understand the role their airport plays in the state and use it as a guide to improve facilities and services for their aviation users. The Individual Airport Report is divided into two sections: Section One provides an overview of the statewide aviation system; and Section Two provides specific information for the Mason City Municipal Airport. Additional information regarding the *Iowa Aviation System Plan* can be found at http://www.iowadot.gov/avaition.index.html.

Section One - System Plan Overview

1.1 System Planning Process

Development of a meaningful and useful planning document centered on the analysis of data collected for the system's inventory and input received from public involvement on issues, concerns, and needs affecting aviation in Iowa. A comprehensive data collection effort, analysis, and significant public involvement guided the development of the 2010 *Iowa Aviation System Plan*. Contributions from the System Plan Technical Advisory Committee, comprised of individuals involved in different aspects of aviation across the state, as well as input received from the public at five input meetings, also guided the planning process. The process to complete the *Iowa Aviation System Plan* included the following steps:

- Identify goals, objectives, and performance measures.
- Inventory of existing aviation facilities and infrastructure.
- Update airport roles.
- Identify facility and service targets for airport roles.
- Forecast of aviation activity.
- Discuss emerging trends and technologies.
- Develop system recommendations.

1.2 System Plan Goals, Objectives, and Performance Measures

The identification of goals establishes the framework necessary to guide future development and maintenance of the system's airports based on key areas of existing and anticipated user needs. Meeting these goals allows airports to provide facilities and services that meet the air transportation demands of the economy, citizens, and visitors of the state.

The following six goals were established for the system to adequately meet user demands and achieve the overall vision of aviation in lowa:

- Safety and Security Provide a safe and secure system of airports.
- Infrastructure and User Support Provide an airport system that meets existing and future user needs
- Accessibility Provide a system of airports that is adequately accessible from both the ground and the air.
- **Economic Support** Support economic development through the air transportation system.
- Planning Establish airport-related local planning to guide the development and operation of airports in lowa.
- **Education and Outreach** Provide local aviation education opportunities that promote understanding, safety, utilization, and career development.

Objectives identify specific means and methods needed to achieve each goal based on an assessment of existing and future user needs. Some objectives may target facilities or services, while others quantify future needs. Not all objectives will be applicable to each airport as some may be adapted to the role it serves within the aviation system.

Performance measures establish criteria to evaluate whether the system is meeting the objectives. Performance measures identify desired levels of the objectives to determine the system's progress towards achieving the goals. Typically expressed as a percentage, the performance measures are used to identify strengths and weaknesses that contribute towards the development of the Plan recommendations. The following lists the objectives and performance measures for each goal.

Goals, Objectives, and Performance Measures			
Objectives	Performance Measures		
Goal: Safety and Security			
 Airports have clear approaches to primary runways. 	Percent of airports with clear primary runway approaches.		
 Airports have clear approaches to all runways. 	 Percent of airports with clear approaches to all runways. 		
 Airports have emergency response plans. 	 Percent of airports with emergency response plans. 		
 Airports develop and implement security plans. 	 Percent of airports with airport security plans. 		
Goal: Infrastructure and User Support			
 Airports meet facility targets identified for their specific role. 	* Percent of airports meeting facility targets.		
 Airports meet service targets identified for their specific role. 	 * Percent of airports meeting at least 75% of service targets. 		
 Primary runways maintained to PCI of 70 or higher. 	 Percent of airports with primary runway PCI of 70 or greater. 		
 Airports maintain an overall PCI of 70 or higher. 	 Percent of airports with overall airport PCI of 70 or greater. 		
 Based aircraft stored in covered hangars. 	 Percent of airports with aircraft storage for all based aircraft. 		
Goal: Accessibility			
 A 30-minute or less drive time to a commercial or enhanced service airport. A two-hour or less drive time for most lowans to a commercial service airport A 30-minute or less drive time to an airport with weather reporting equipment. A 30-minute or less drive time to an airport with an instrument approach for most lowans. A 30-minute or less drive time to an airport with a vertically guided approach. Goal: Economic Support Airports coordinate with local economic development offices, chambers of commerce, and city and county officials to include airport information in business promotion materials. Most of the employment is within a 30 minute drive time of a commercial or enhanced airport. Airports support aircraft owned and operated by companies 	 Percent of population 30 minutes from a commercial service or enhanced service airport. Percent of population within two hours of a commercial service airport. Percent of population within 30 minutes of an airport with weather reporting equipment. Percent of population within 30 minutes of an airport with an instrument approach. Percent of population within 30 minutes of an airport with a vertically guided approach. Active coordination with local economic development offices, chamber of commerce, city, and county officials to include airport in business materials. Percent of employment within 30 minutes of a commercial service or enhanced airport. 		
doing business in proximity to an airport.			
Goal: Planning			
 Airports have a current master plan or ALP. 	 * Percent of airports with a current master plan and/or ALP. 		
 Airports are protected by local height zoning ordinances. 	 Percent of airports protected by airport height zoning. 		
 Airports are included in city/county comprehensive plans or land use plans that address compatible land use around airports. 	 Percent of airports with compatible land use planning through city/county comprehensive planning or land use plans. 		
Goal: Education and Outreach			
Airports establish regular communication programs	Percent of airports with regular communication programs.		
(navialettene musee veleeses viele eitee en eseiel meelie \	Demand of almosts that have been described about a surface		

- Airports establish regular communication programs (newsletters, press releases, web sites, or social media.)
- Airports have based rental aircraft and availability of regular flight instruction.
- Airports host pilot safety programs.
- Airports host annual aviation events such as fly-ins, air shows, and static aircraft displays.
- Airports host additional types of public events such as business after hours receptions or open houses.
- Airports host organized youth education activities such as Young Eagles events or youth camps.
- Percent of airports that have based rental aircraft and regular flight instruction.
- Percent of airports that host pilot safety programs.
- Airports host annual aviation events.
- Airports host additional types of public events.
- Airports host organized youth education activities.

Note: * = Measurement criterion to evaluate performance varies by role.

1.3 Airport Roles

Airports in lowa serve varying types of users and levels of demand. Airports were classified into one of five airport roles based upon their capability to support various types of aircraft and aviation users. Airports were assigned to a role based on currently meeting specific facility and services criteria. As conditions change and an airport meets the criteria for a higher level role, the plan is flexible to recognize role changes. The following table lists each role and its classification criteria while the following graphic identifies the location of each system airport.

Role Classification Criteria

System Role Criteria

Commercial Service – Commercial Service airports support some level of scheduled commercial airline service, have the infrastructure and service available to support a full range of general aviation activity, meet most needs of the aviation system, and serve as essential transportation and economic centers of the state.

Commercial airline service.

Enhanced Service – Enhanced Service airports have runways of 5,000 feet or greater in length, facilities and services that can accommodate a full range of general aviation activity including most business jets, serve business aviation, and are regional transportation centers and economic catalysts.

- 5,000 foot or greater paved runway.
- Airport Reference Code (ARC) of C-II or greater.
- Full time staffing during regular weekday and weekend business hours, available 24 hours a day.
- Availability of most based services including aircraft maintenance, flight training, rental aircraft, and aircraft charter.
- · Availability of jet fuel.
- Weather observing system located on airport.

General Service – General Service airports have runways 4,000 feet or greater in length, facilities and services customized to support most general aviation activity including small to mid-size business jets, and service as a community economic asset.

- 4,000 foot or greater paved runway.
- Availability of some based services including aircraft maintenance, flight training, rental aircraft, and aircraft charter.
- Staffing during regular business hours.

Basic Service – Basic Service airports have runways 3,000 feet or greater in length with facilities and services customized to meet local aviation demands.

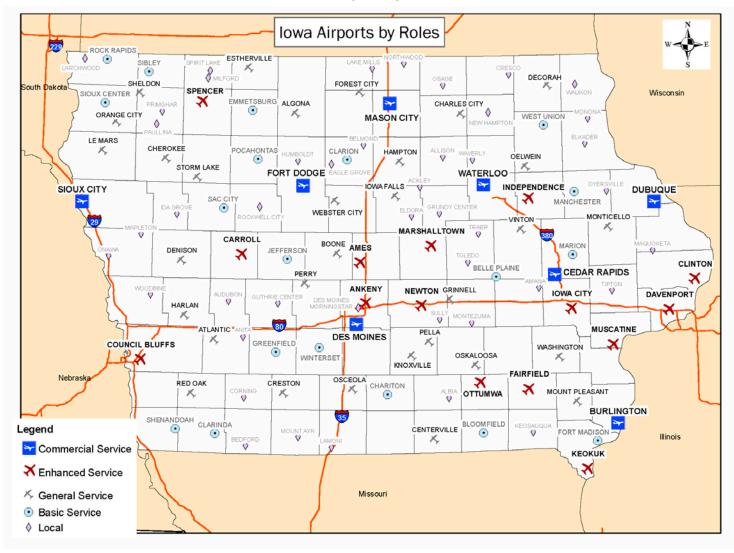

- 3,000 feet or greater paved runway.
- Availability of aircraft fuel.
- Some availability of airport or FBO personnel or on-call availability 24 hours.

Local Service – These airports support local aviation activity, offer few airport services, have turf runways, or are unable to meet criteria defining any other role.

- Turf runways.
- Airports not meeting criteria in any other roles.

Iowa Airports by Roles

1.4 Facility and Service Targets

Facility and service targets were established to help airports, within a specific role, meet the needs of their users. While not all targets are required for inclusion in a particular role, these are recommended levels of service and/or facility targets appropriate for the type of use associated with each role. Airports are encouraged to meet or exceed suggested targets for their role to satisfy local and aviation system needs.

The targets are separated into two main categories: airside and landside facilities, and services. Targets for each role vary based on the needs of aviation users for that role. The Enhanced Service airports, for example, will have more targets to meet the needs of business users. There are fewer targets for Local Service airports since they serve users with fewer requirements for operation. In the table below, targets for Commercial Service airports are combined with Enhanced Service targets, since in most categories, Commercial Service airports will exceed targets. Targets required for inclusion in a role are highlighted in red in the following facility and service tables.

Facility Targets

Target Description	Commercial/Enhanced Service Targets	General Service Targets	Basic Service Targets	Local Service Targets			
Airside							
Airport Reference Code	C-II	B-II	B-I or below	A-I			
Primary Runway Length	Minimum 5,000 ft	Minimum 4,000 ft	3,000 ft	Not an objective			
Primary Runway Width	Minimum 100 ft	Minimum 75 ft	Minimum 60 ft	Minimum 50 ft			
Type of Parallel Taxiway	Full parallel	Turnarounds meet standards (both ends)	Exits as needed	Not an objective			
Type of Runway Approach	Vertical guidance	Non-precision	Visual	Visual			
Runway Lighting	MIRL	MIRL	LIRL	Not an objective			
Taxiway Lighting	MITL	MITL	Not an objective	Not an objective			
Visual Guidance Slope Indicator	Both runway ends (or ILS)	Both runway ends	Not an objective	Not an objective			
Runway End Indentifier Lights (as required)	Both runway ends (or ILS)	Both runway ends	Not an objective	Not an objective			
Rotating Beacon	Yes	Yes	Yes	Not an objective			
Lighted Wind Indicator	Yes (multiple as needed)	Yes	If open for night	If open for night			
RCO Facilities	Tower or RCO	Not an objective	Not an objective	Not an objective			
Wind coverage or crosswind runway	Crosswind runway or 95% wind coverage for NPIAS facilities	Crosswind runway or 95% wind coverage for NPIAS facilities	Not an objective	Not an objective			
	Lan	dside					
Covered storage	100% of based aircraft	100% of based aircraft	100% of based aircraft	Not an objective			
Overnight storage for	Typical average aircraft/	Typical average aircraft/					
business aircraft	business user demand	business user demand	Not an objective	Not an objective			
Aircraft apron	100% of average daily transients	100% of average daily transients	50% of average daily transients	Not an objective			
Terminal/administration building	Yes	Yes	Waiting area	Not an objective			
Paved entry/terminal parking	Yes	Yes	Not an objective	Not an objective			

Note: Targets highlighted in **RED** are requirements for role classification

Service Targets

Target Description	Commercial/Enhanced	General Service	Basic Service	Local Service			
rarget Description	Service Targets	Targets	Targets	Targets			
	Services						
Fuel (type & hours)	100LL & Jet A - 24 hour - single point	100LL	100LL	Not an objective			
Weekday hours of operation	Standard business hours, after hours on-call	Standard business hours, after hours on- call	On-call	Not an objective			
Weekend hours of operation	Standard business hours, after hours on-call	Standard business hours, after hours on- call	On-call	Not an objective			
Ground transportation	Courtesy car/car rental available	Courtesy car/car rental available	Not an objective	Not an objective			
Food & Beverage	Vending	Vending	Not an objective	Not an objective			
Posted contact info	Yes	Yes	Yes	Yes			
Internet access	Yes	Yes	Not an objective	Not an objective			
Restroom	Yes	Yes	Yes	Not an objective			
Pilot area	Yes	Yes	Not an objective	Not an objective			
Security	Security plan	Security plan	Security plan	Security plan			
Snow removal	Timely snow removal	Timely snow removal	Snow removal	Not an objective			
Rental aircraft	Based	Based	Not an objective	Not an objective			
Flight training	Available	Available	Available	Not an objective			
Aircraft maintenance/repair	Based	Based	Not an objective	Not an objective			
Aircraft charter	Based	Available	Available	Not an objective			
Weather reporting/flight planning capabilities	Yes	Yes	Not an objective	Not an objective			

Note: Targets highlighted in **RED** are requirements for role classification

1.5 System Forecasts, Trends, and Technology

During the past decade, aviation activity was impacted by economic conditions and events that were difficult to predict. Projections for the next twenty years indicate commercial airline enplanements, based aircraft, and operations are expected to experience slow growth. The 2010-2030 Federal Aviation Administration (FAA) Aerospace Forecast projects that the number of active aircraft throughout the planning period will increase at one percent (1.0%) annually, while the number of based aircraft in the state is projected to be slightly higher at 1.25 percent (1.25%). Aircraft operations are anticipated to increase at one-half of one percent annually.

Several anticipated trends and developing technologies will affect aviation in Iowa throughout the planning period. It is important the system is prepared to adapt to these changes to meet the short-and long-term needs of aviation users. Topics that could significantly impact aviation in Iowa include the implementation of the Next Generation Air Transportation System (NextGen), environmental sustainability, and future aircraft types.

1.6 System Plan Recommendations

Federal, state, and local airport sponsors all have a role in providing adequate infrastructure and services to support the demands of the air transportation system. Review of the system's performance and comments received from the public and the System Plan Technical Advisory Committee identified recommended improvements and initiatives. Recommendations address specific goals and general concepts for the system. A cooperative approach towards the implementation of plan

recommendations is necessary for the Iowa aviation system to meet the air transportation demands of the state. Continued management of essential programs and services by the Iowa Department of Transportation (Iowa DOT) Office of Aviation helps strengthen the safety and security of the state aviation system.

Airport sponsors own and operate the airports, having ultimate responsibility for daily and long term operations and maintenance. Recommendations in the *Iowa Aviation System Plan* provide a guide for airport sponsors to assess their role to ensure that Iowa has safe, quality facilities and services to meet the air transportation needs. Recommendations to enhance safety of the system include actively mitigating obstructions, developing and enforcing compatible land use controls, actively mitigating wildlife hazards, and developing emergency response plans. Airport sponsors are encouraged to engage their community leaders and stakeholders in developing a strategic plan to guide the future of the airport and its role in economic development. More specific recommended actions are detailed beginning on Page 13 of this report.

1.7 System Plan Summary

The lowa aviation system is an integrated network of users, aircraft, businesses, airports, technologies, and services that supports the economy and serves as a transportation resource for both the state and the nation. The lowa DOT, in conjunction with the FAA and individual owners and operators of each airport, continue to strive towards meeting system goals and objectives to maintain a safe, efficient, and effective aviation system. As airports respond to changing needs of aviation users and the communities they serve, it is important to consider both facilities and services identified in the targets established for airport roles.

Maintaining and developing the airports' infrastructure and services is critical to the continued health of lowa's economy and the quality of life for lowans. Through addressing needs identified in the recommendations, the *Iowa Aviation System Plan* will help ensure users of the aviation system are offered safe, quality facilities and services that support the air transportation demands of Iowa for the next twenty years.

Section Two – Individual Airport Overview

This section provides information specific to the Mason City Municipal Airport, including a brief history of the airport, forecasts of operations and based aircraft, performance measure recommendations, a summary of capital improvement projects, and an airport fact sheet.

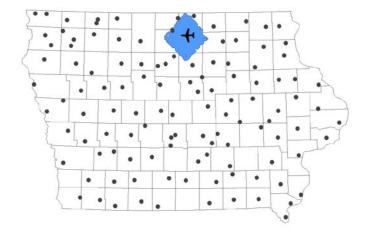

2.1 Airport Summary

The Mason City Municipal Airport It is owned by the City of Mason City. An airport commission, with five members appointed by the mayor, was established to manage and operate the airport. The FAA recognizes the airport as playing a role in the national airport system and includes the airport in the National Plan of Integrated Airport Systems (NPIAS) as a non-hub primary commercial service airport. (A non-hub airport is one that enplanes more than 10,000, but less than 0.05 percent of the total U.S. passengers.) The airport is eligible for primary passenger entitlement funding.

The *Iowa Aviation System Plan* identifies the Mason City Municipal Airport as a Commercial Service airport. Commercial Service airports support scheduled airline service and have the infrastructure and services available to support a full range of general aviation activity. The airport meets most needs of the aviation system and serves as an essential transportation and economic center of the state. Specific airport information can be found in the Airport Fact Sheet located in the appendix of this report.

The airport serves the north central lowa communities of Mason City and Clear Lake, as well as Cerro Gordo County. The airport was originally constructed at its present site in 1945 as an emergency landing facility during World War II. The airport is located in Cerro Gordo County 6.5 miles to the west of Mason City's central business district and 2 miles east of the business center of Clear Lake. Access to the airport is located approximately one mile east of Interstate 35 from Iowa Highway 122.

30 Minute Drive Time

Airport Location

2.2 Airport Current Conditions & Facilities

A summary of general airport information, facilities, and services at the Mason City Municipal Airport is included in the Fact Sheet at the end of this report. Airport information in the Fact Sheet reflects updated information and may vary from the 2010 data used in the *lowa Aviation System Plan* technical report. The Mason City Municipal Airport has been classified as an Commercial Service airport. This classification is relevant to specific facility and service targets as well as performance measures.

2.3 Airport Forecasts

Aviation demand projections for based aircraft and aircraft operations were prepared for each of the 117 public use airports in Iowa's aviation system. A number of different FAA forecasting techniques were utilized in the projection of aviation activity at each airport ranging from subjective judgment to mathematical modeling based on historical trends. Data obtained from airport managers, the Office of Aviation, the 2010-2030 FAA Aerospace Forecast, and the FAA Air Traffic Activity Data System (ATADS) also contributed to the projections developed for each airport.

Based aircraft projections were developed for each airport by multiplying a compound annual growth rate (CAGR) of 1.25 percent (1.25%) to the number of current (2010) based aircraft at each airport as reported by airport managers. Aircraft operations were projected by multiplying the forecasted number of based aircraft by an adopted Office of Aviation estimation guideline outlined in FAA Order 5090.3C, *Field Formulation of the National Plan of Integrated Airport Systems (NPIAS)*. This is an acceptable procedure to forecast operations where limited or no historical data may be available, permitting a single methodology to be applied to all airports. Airports with 1 to 30 based aircraft forecasted were assigned 250 operations per aircraft, while airports with 31 to 99 based aircraft were assigned 350 operations per aircraft. Airports forecasted with 100 or more aircraft were assigned 450 operations per aircraft. The based aircraft and operations projections developed for Mason City Municipal Airport using the methodologies as described previously are presented in the following table.

Airport Forecasts

Forecast Year	Based Aircraft	Operations
2010	39	13,650
2015	41	14,350
2020	44	15,400
2025	47	16,450
2030	50	17,500

Operations: FAA Order 5090.3C, FAA Aerospace Forecast 2010-2030, FAA ATADS

2.4 System Performance by Airport

Although progress has been made to achieve the goals and objectives, continuous improvements are necessary to provide Iowa with an air transportation system that supports the economy and quality of life demands. Mason City Municipal Airport has a role in meeting these goals by striving to meet the individual performance measures that are applicable to its current role as an Commercial Service airport. Each airport plays a role in meeting the goals and objectives. Individual airports can assess their specific performance,

to determine what is appropriate to meet their needs, taking into account the recommendations from the system plan. It is understood that full implementation of some of the targets may not be feasible; however, it is important to identify goals and work to attain those that are reasonable.

2.4.a Recommendations to Support the System Plan Goals

Evaluation of how well the Mason City Municipal Airport is meeting the objectives identified areas that could be improved to achieve the system plan goals. Focusing future improvements to enhance facilities, services, and planning to meet the objectives, while maintaining existing performance in areas meeting or exceeding desired conditions, contributes to a vibrant aviation system. Recommendations included on Page 14 list actions the airport may consider to benefit users of aviation in Iowa. In addition to specific recommendations to meet system goals and objectives, the *Iowa Aviation System Plan* recommends that airport sponsors and managers take the following actions to enhance a safe and effective operating environment:

- Reduce on-airport wildlife habitat and mitigate hazardous wildlife activity to limit potential safety concerns.
- Engage community leaders and stakeholders in developing a strategic plan to guide the development of the airport, coordinating with economic development interests.
- Develop a welcome image for visitors arriving by air and provide directional signage to the business community to ensure a connection.
- Actively work to protect runway approaches by developing or enforcing height and compatible land use zoning.

2.4.b Recommendations to Achieve the Facility and Service Targets

Facility and service targets identify levels of infrastructure and services that are desirable to effectively meet user needs. Though it may not be feasible to meet or exceed all targets, the airport is encouraged to develop and maintain facilities and services to levels defined for the Commercial Service role. The tables presented on Page 15 and Page 16 identify what is recommended for the Mason City Municipal Airport to achieve each target.

Airside and Landside Facility Target Needs

Target Description	Existing Condition		Target	Recommendation	
Airside Facilities					
Airport Reference Code	C-III		C-II	Maintain airfield to at least C-II design standards	
Primary Runway Length	6,5	01 ft	Minimum 5,000 ft	Maintain runway length to at least 5,000 ft	
Primary Runway Width	15	0 ft	Minimum 100 ft	Maintain at least 100 ft runway width	
Type of Parallel Taxiway	Full p	arallel	Full parallel	Maintain full parallel taxiway	
Type of Runway Approach	Pred	cision	Vertical Guidance	Maintain an approach that provides at least vertical guidance	
Runway Lighting	Н	IRL	MIRL	Maintain at least MIRL runway lighting	
Taxiway Lighting	N	IITL	MITL	Maintain MITL taxiway lighting	
Visual Guidance Slope Indicator	Rwy 18 VASI	Rwy 36 PAPI	Both runway ends (or ILS)	Maintain a VGSI on both runway ends	
Runway End Identifier Lights (as required)	No	No	Both runway ends (or ILS)	Maintain ILS approach	
Rotating Beacon	Y	'es	Yes	Maintain rotating beacon	
Lighted Wind Indicator	Y	'es	Yes - Multiple as needed	Maintain lighted wind indicator	
RCO Facilities	R	СО	Tower or RCO	Maintain RCO	
Wind coverage or crosswind runway	Crosswind runway		Crosswind runway or 95% coverage for NPIAS facilities	Maintain crosswind runway	
		Landsic	le Facilities		
Covered storage for based aircraft	98% of ba	sed aircraft	100% of based aircraft	Construct additional storage for 100% of based aircraft	
Overnight storage for business aircraft	No		Typical average aircraft/ business user demand	Construct additional overnight storage for itinerant business aircraft	
Aircraft apron	100% of average daily transients		100% of average daily transients	Maintain apron size to park 100% of average daily transients	
Terminal/administration building	Free s	tanding	Yes	Maintain terminal building	
Paved entry/terminal parking	Entry & parking		Entry & parking	Maintain paved entry road & parking lot	

Service Target Needs

Target Description	Existing Condition	Target	Recommendation			
Services						
Fuel (type & hours)	Type: Jet A & 100LL 24 hour availability: Yes	100LL & Jet A (24 hrs - single point)	Continue to provide 100LL & Jet A fuel with 24 hour availability			
Weekday hours of operation	7am-5pm	Standard business hours; after hours on-call	Continue to maintain staffing during standard business hours and after hours on-call			
Weekend hours of operation	Saturday 7am-5pm; Sunday 8am-5pm	Standard business hours; after hours on-call	Continue to maintain staffing during standard business hours and after hours on-call			
Ground Transportation	Courtesy car & car rental	Courtesy car/ car rental available	Continue to provide a courtesy car and/or car rental availability			
Food & Beverage	& Beverage Yes Vending		Continue to provide at least vending services			
Posted contact info	Yes	Yes	Continue to post and update after hours contact information			
Internet access	Computer & wireless	Yes	Continue to provide a method to access the internet			
Restroom	Number of restrooms: 2	Yes	Continue to provide restrooms			
Pilot area	Yes	Yes	Continue to maintain a pilot area			
Security plan	Yes	Security plan	Continue to maintain and update security plan annually			
Snow removal	Anti-icing & plowing	Timely Snow Removal	Continue to provide timely snow removal			
Rental aircraft	Available	Based	Provide based rental aircraft			
Flight training	Based	Available	Continue to provide flight training			
Aircraft maintenance/repair	Based	Based	Continue to offer based aircraft maintenance and repair			
Aircraft charter	Based	Based	Continue to offer based aircraft charter			
Weather reporting/ flight planning capabilities	Yes	Yes	Continue to provide weather reporting & flight planning capabilities			

2.5 Potential Projects

Although significant investment has been made to improve the overall condition of system infrastructure, it is important to continue to preserve and develop infrastructure to meet the needs of aviation users. In addition to needed facility and service target improvements, specific airport needs identified on Capital Improvement Plans (CIPs) and Long Range Needs Assessments (LRNAs) were evaluated to project the anticipated level of investment that will be required by airports throughout the twenty year planning period.

To determine the anticipated level of investment needed at the Mason City Municipal Airport, the following resources were referenced:

- Cost estimates for airports to achieve 100% of the system plan facility targets.
- 2011-2016 Airport Capital Improvement Program (CIP) plans.
- Airport Long Range Needs Assessments (LRNA).
- Cost estimates to meet the system plan Airport Layout Plan objective, focusing on the development and continual update of electronic ALPs (e-ALPs).
- Cost estimates to maintain pavement condition index at 70 using pavement rehabilitation projects identified in the Iowa Statewide 2010 Pavement Management Report.
- Because of the wide variation in methods to mitigate runway approach obstructions, separate
 costs were not identified to address the clear approach objective. These costs are included in
 many of the airport CIP and LRNA, and will be identified through specific annual initiatives.

A summary of funding needed to address development needs and other potential projects at the Mason City Municipal Airport is presented on Page 18.

2011-2030 Development Needs

Project Description	Funding Needed
T-hangar improvements, Fixed Base Operator (FBO) office relocation, airport building exterior improvements, building demolition	\$792,000
Airport Layout Plan (ALP) update (2011, 2019, 2027)	\$1,350,000
TOTAL	\$2,142,000

Source: 2011-2016 CIP Plans, LRNA plans, Iowa Statewide 2010 Pavement Management Report, Mead & Hunt, Inc.

2011-2030 Other Potential Projects

Project Description	Funding Needed
Aircraft Rescue and Fire Fighting (ARFF) facility	\$1,478,800
Rehabilitate parking lot	\$800,000
Rehabilitate entrance road	\$951,564
Airfield pavement maintenance	\$400,000
Snow removal equipment	\$590,000
Snow removal equipment	\$350,000
Jetbridge	\$700,000
TOTAL	\$5,270,364

Source: 2011-2016 CIP Plans, LRNA plans, Iowa Statewide 2010 Pavement Management Report, Mead & Hunt, Inc.
