Renew and Review – Upgrade Your SLEIS Skills

SLEIS — State & Local Emissions Inventory System

The State & Local Emissions Inventory System (SLEIS) can simplify your 2019 air emissions inventory report and ensure it is complete and accurate. This web-based system includes several user-friendly features:

- It's fast: Pre-populated with the most recent equipment and emissions data for your facility – reducing your data entry time.
- It's easy: SLEIS has a tip tool with field-level help text and required fields are easily identifiable.
- It's efficient: SLEIS offers the option to import emissions data via a spreadsheet template.
- Get started today: SLEIS access request forms are available at https://programs.iowadnr.gov/sleis.

> "I was a first time user with no prior training. I was able to navigate through the system and enter the information required for my company. The SLEIS program made this process very easy."
